PROFESSIONAL SUMMARY

Senior Art Director and UX/UI Designer with 9 years of experience in advertising and digital design. I create campaigns, landing pages, email marketing and digital experiences for brands such as Itaú, Azul Airlines and XP Investimentos, and for international clients of the Finnish interactive 3D studio Stereoscape, including Wärtsilä, Nokia, Valmet and Vaisala.

I am not a software engineer, but I build what I design. Using AI-assisted development (Claude Code), I turn my own designs into working websites, landing pages, web apps and interactive spreadsheets, shortening the path from concept to live product. Available for full-time roles and freelance projects.
